Hello Amy! I am sending this email in regards to our garden hose being turned and left on, approximately June 18th or 19th, until I found it on June 22. I honestly don't know what happened, we noticed low water pressure, but thought it was due to the new water tower being installed. We finally realized it when we went to get Hank's kayak out of the basement and realized it was flooded, due to the foundation being over a hundred years old and the water was seeping in. I would greatly appreciate it if the board considers crediting the sewer portion of my bill due to this unfortunate situation. Thank you in advance.

Amy Eddy
